They agreed come by for a quick look at the sludge. Theresa with Gainco is going to give you a call she has a portable steam genie.

Steve:

There is probably a bunch of red tape to get approval to put in a portable incinerator. I would be surprised if it is cost effective to do this. I am not sure what the regulatory hurdles would be to do this. It is usually not a last minute thing to propose.

Thanks

Gary,

Sorry I didn't respond yesterday. Today we have an on-site meeting with a company that has portable incineration units and are evaluating the costs and the timing. We've also revisited the use of a centrifuge. By the end of the day tomorrow I should be able to give you a schedule of upcoming work.

We have completed Tank 2.
